REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistake or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, U.S. Army Troop Support Command, ATTN: AMSTR-MCTS, 4300 Goodfellow Boulevard, St. Louis, MO 63120-1798. A reply will be furnished directly to you.

Section	III SPECIAL TOOLS LIST (Not Applicable)		
	IV NATIONAL STOCK NUMBER AND REFERENCE NUMBER INDEX		373

SECTION I

INTRODUCTION

1. Scope

This joint Army, Navy, Air Force and Marine Corps manual lists repair parts and special tools, required for the performance of organizational, intermediate (field), direct and general support and depot maintenance of the Generator set. The following paragraphs are keyed to applicable users. All users should read paragraph 4, Special Information prior to using this manual.

NOTE

(Army) Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. (ALL) Repair Parts - Section II. A list of repair parts is authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support and depot level in figure and item number sequence.

b. (ALL) Special Tools, Test and Support Equipment - Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support and depot level (Not applicable).

c. National Stock Number and Reference Number Index - Section IV. A list of National Stock Numbers in ascending numerical sequence followed by a list of reference numbers appearing in all the listings, in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and items number.

3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in Sections II and III.

a. (ALL) Illustration. (Column 1) this column is divided as follows:

(1) Figure number. (Column 1a) indicates the figure number of the illustration on which the item is shown.

(2) Item number. (Column 1b) indicates the callout number used to reference the item on the illustration.

b. (ALL) Source, Maintenance, and Recoverability Codes (SMR), (Column 2).

(1) Uniform Source Codes applicable to all Military Services. GENERAL: Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<u>Code</u>	<u>Definition</u>
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply system.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature. Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stock for initial issue or outfittings to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.
KD	An item of depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a Maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at intermediate maintenance levels.

Air Force - Intermediate (*)
Army - Direct Support (*)
Marine Corps - 3rd Echelon
Navy - Afloat

MH Item to be manufactured or fabricated intermediate maintenance levels.

Air Force - Intermediate (*)
Army - General Support (*)
Marine Corps - 4th Echelon
Navy - Ashore

MG Item to be manufactured or fabricated at both afloat and ashore intermediate maintenance levels - Navy use only.

MD Item to be manufactured or fabricated at depot maintenance level.

AO Item to be assembled at organizational level.

AF Item to be assembled at intermediate maintenance levels.

Air Force - Intermediate (*)
Army - Direct Support (*)
Marine Corps - 3rd Echelon
Navy - Afloat

AH Item to be assembled at intermediate maintenance levels.

Air Force - Intermediate (*)
Army - General Support (*)
Marine Corps - 4th Echelon
Navy - Ashore

AG Item to be assembled at both afloat and ashore intermediate maintenance level - Navy use only.

AD Item to be assembled at depot maintenance levels.

XA Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

XB Item is not procured or stocked. If not available through salvage, requisition.

XC Installation drawings, diagram, instructions sheet, field service drawing, that is identified by manufacturer part number.

(*) NOTE: For USAF and the USA Safeguard Program, only Code 'F' will be used to denote intermediate maintenance. On joint programs use of either code F or H by the joining service will denote intermediate maintenance USAF and the USA Safeguard program.

(2) Uniform Maintenance Codes applicable to all Military Services: GENERAL: Maintenance Codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support Items.

The maintenance codes are in the third and fourth position of the Uniform SMR Code Format.

(a) USE (THIRD POSITION): The maintenance code entered in the third position indicates the lowest level maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position indicates one of the following levels of maintenance.

<u>Code</u>	<u>Application/Explanation</u>
O	Support item is removed, replaced, used at the organizational level of maintenance.
F	Support item is removed, replaced, used at the following intermediate levels: USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - 3rd Echelon
G	Support item is removed, replaced, used at both afloat and ashore intermediate levels: Navy Only.
H	Support item is removed, replaced, used at the following intermediate levels: USAF - Intermediate (*) USA - Direct Support (*) USN - Ashore (Only) USMC - 4th Echelon

(*) NOTE: For USAF and the USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs use of either code F or H by the joining service will denote intermediate maintenance USAF and the USA Safeguard program.

D	Support items that are removed, replaced, used at depot only: USAF - Depot, Mobile Depot and Specialized Repair Activity USA - Depot, Mobile Depot and Specialized Repair Activity USN - Aviation Rework, Avionics and Ordnance Facilities, and Shipyards USMC - Depot
---	--

(b) REPAIR (FOURTH POSITION): The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capacity to perform complete repair (i.e., all authorized maintenance functions).

<u>Code</u>	<u>Application/Explanation</u>
-------------	--------------------------------

O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
---	--

F	The lowest maintenance level capable of complete repair of the support item is the following intermediate level:
---	--

	USAF - Intermediate (*)
	USA - General Support (*)
	USN - Ashore (Only)
	USMC - 4th Echelon

H	The lowest maintenance level capable of complete repair of the support item is the following intermediate level:
---	--

	USAF - Intermediate (*)
	USA - General Support (*)
	USN - Ashore (Only)
	USMC - 4th Echelon

(*) NOTE: For USAF and the USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs use of either code F or H by the joining service will denote intermediate maintenance USAF and the USA Safeguard program.

G	Both afloat and ashore intermediate levels are capable of complete repair of support item: Navy Only.
---	---

D	The lowest maintenance level capable of complete repair of the support item is the depot level.
---	---

	USAF - Depot, Mobile Depot, and Specialized Repair Activity
	USA - Depot, Mobile Depot and Specialized Repair Activity
	USN - Aviation Rework, Avionics and Ordnance Facilities, and Shipyards
	USMC - Depot

L	Repair restricted to designated Specialized Repair Activity.
---	--

Z	Nonreparable. No repair is authorized.
---	--

B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.
---	---

(3) Uniform recoverability codes applicable to all Military Services: GENERAL: Recoverability codes are assigned to support items to indicate the disposition action on unservicable items. The recoverability code is entered in the fifth position of the Uniform SMR code Format as follows:

Recoverability Codes

Definition

- Z Nonreparable item. When unservicable, condemn and dispose at the level indicated in column 3.
- O Repairable item. When uneconomically repairable, condemn and dispose at organizational level.
- F Repairable item. When uneconomically repairable, condemn and dispose at the following intermediate levels:
- USAF - Intermediate (*)
 - USA - Direct Support (*)
 - USN - Afloat
 - USMC - 3rd Echelon
- H Repairable item. When uneconomically repairable, condemn and dispose at the following levels:
- USAF - Intermediate (*)
 - USA - General Support (*)
 - USN - Ashore
 - USMC - 4th Echelon
- (*) NOTE: For USAF and the USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs use of either code F or H by the joining service will denote intermediate maintenance USAF and the USA Safeguard program.
- D Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
- L Repairable item. Repair, condemnation and disposal not authorized below depot/Specialized Repair Activity level.
- A Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high-dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. (USMC) Special Stockage Indicator Code and Replacement Factor Column (3).

(1) Special Stockage Indicator Code (Column 3a).

This column reflects the condition under which certain maintenance parts, (parts assigned FSN's and coded in the "P" series source code of the MSR code), are stocked. The codes are explained as follows:

Code

Description

No code Indicates that the part may or may not be authorized in initial allowances to using or supporting organizations. The manner of determining initial issue allowances is explained in paragraph (2) below.

- I Applied to maintenance parts for which predicted consumption would not warrant inclusion in Mount-Out but, for which a quantity of one (1) is authorized as insurance for Mount-Out using a 360-day criteria. This criteria is based on the total density of equipments employed by the DIV/WING TEAM. Mount-Out allowances, so authorized, will be stocked by the FSR or the MWSG in the case of MARINE Wing peculiar equipment, as applicable.
- D Applied to maintenance parts that are not considered critical or essential to be on hand and are, therefore, not authorized in initial allowances; however, these items are stocked within the Supply System and may be requisitioned based upon usage.
- T Indicates that the part is authorized in garrison operating allowances in order to comply with state and local laws; however, the part is not authorized in Mount-Out since it is not combat essential.

(2) Replacement Factor (column 3b). This column reflects the replacement factor assigned to each National Stock Numbered maintenance repair part on its first appearance in the publication. The replacement factor, expressed as a decimal, indicates the average rate at which the type of item so coded has been used by Marine Corps field units or the rate at which design engineers anticipate the item will fail, wear out, or otherwise require replacement. All computations are based on a replacement period of one year. Therefore, a replacement factor of 0.08, applied to an item in this stock list, indicates that eight out of every one hundred of such items used in the end item of equipment to which this publication pertains, is predicted to need replacement in one year. Likewise, 0.004 reflects that four out of every thousand in use are predicted to require replacement in one year, while 2.0 shows that every one in use is predicted to be replaced twice during each year.

(a) Initial authorized stockage levels of consumable and salvageable items for an organization are to be computed for predicted consumption based on the number of items employed and/or supported by an organization within the number of days for which stockage is authorized. In computing Garrison Operating Stock or Mount-Out, authorized levels can be determined by the requiring Marine Corps unit by multiplying the replacement factor times the quantity used per equipment, times the number of end items employed by the using organization or supported by the service organization, times the authorized day level expressed in months and divided by 12. Specific formulas and examples are provided in Marine Corps Order, MCO P4400.79.

The replacement factors used in initial stockage computations, should be revised, if warranted, after significant usage is experienced in accordance with the guidelines of MCO 4400.32A. The following formula replacement factor, "X" represents actual usage experience (1 year), "A" represents the application per equipment, and "B" represents the number of equipments supported.

$$\frac{X}{A \times B}$$

(b) Initial allowances for maintenance float items (recoverability codes "R" and "D") for the FMF and appropriate post and stations are as furnished by Initial Issue Actions.

Changes to maintenance replacement rates resulting from actual usage may require recomputation of maintenance float allowances by holding units. Any required recomputation of maintenance float allowances will be made in accordance with MCO 4600.6.

(c) The replacement factor for same as (S/A) items is indicated upon the first appearance of the item in the major combination, component or assembly.

d. (ALL) National Stock Number (Column 4). Indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

e. (ALL) Description, (Column 5). Indicates the Federal item name and any additional description of the item required. The abbreviation "w/e" when used as part of the nomenclature, indicates the National Stock Number, includes all armament, equipment, accessories and repair parts issued with the item. A part number or other reference number is followed by the applicable five digit Federal Supply Code for Manufacturer. If two reference numbers and Federal Supply Codes for manufacturer are listed, the first listing refers to the Department of the Defense Drawing Number, the second listing refers to the actual part manufacturer.

f. (ALL) Unit of Measure (U/M), (Column 6). A two character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.

g. (ALL) Quantity Incorporated in Unit, (Column 7). Indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

h. (MC) Quantity per Equipment, (Column 8). Indicates the consolidated quantity of a maintenance part used on an end item upon every appearance of the part in this publication.

4. Special Information.

a. Usable on codes are shown in the description column. Uncoded items are applicable to all models and/or serial number range. Identification of the usable codes used in this publication are:

<u>Code</u>	<u>Used On</u>
CLA	MEP-005A
CLB	MEP-104A
CLC	MEP-114A
CZN	MEP005A (Serial Nos. KZ00001 thru KZ02752)
CZM	MEP-104A (Serial Nos. KZ00001 thru KZ02752)
DGG	MEP-114A (Serial No. RZ70001 and sub.)

b. (Army) Repair Parts Mortality has been based on 5000 hours operation per year.

c. (Army) The basis of issue for authorized tools, test and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations as follows:
(such as, soldering iron per five MOS284.1 supporting 1-15 Radio Set AN/ARC-51).

d. (Army) Parts which require manufacture of assembly at a category higher than that authorized for installation will indicate in the source column, the higher category.

e. Stockage Information

(1) Air Force Stockage information is contained in Initial Supply Support Lists issued separately from this publication by SMAMA in accordance with ARM-67-1, part 1, Chapter 12.

(2) Navy stockage objectives are contained in Consolidated Shipboard Allowance List as furnished separately from the publication by the Ship Parts Control Center.

(3) Marine Corps Stockage information is contained in Block 3.a. of this manual.

5. How to Locate Repair Parts

a. (ALL) When National Stock Number or Reference Number is Unknown:

(1) First. Using the table of contents, determine the assembly group, i.e., batteries and related parts, exhaust and breather pipes, within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Second. Find the illustration covering the assembly group to which the repair part belongs.

(3) Third. Identify the repair parts on the illustration and note the illustration figure and item number of the repair part.

(4) Fourth. Using the Repair Parts Listing, find the assembly group which the repair part belongs in and locate the illustration figure and item number noted on the illustration.

b. (ALL) When National Stock Number or Reference Number is Known:

(1) First. Using the index of National Stock Numbers and Reference Numbers find the pertinent National Stock Number or Reference Number. The index is in ascending NSN sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) Second. Using the Repair Part Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the index of National Stock Numbers and Reference Numbers.

6. Abbreviations

Abbreviations used in preparation of this Technical Manual are in accordance with MIL-STD-12.

AWG	American Wire Gage
ea	each
gen	generator
hz	hertz
KW	kilowatt
LH	left hand
mtg	mounting
RH	right hand
R.P.M.	revolutions per minute
sw	switch
VDC	volts, direct current

7. Reporting of Errors

You can help to improve this manual by calling attention to errors and by recommending improvements. Your letter, DA Form 2028 (Recommended Changes to Publications), and/or Da Form 2028-2 (Recommended Changes to Equipment Technical Manuals), may be used. Copies of Da Form 2028-2 are attached in the back of the manual for your use. Please mail your recommended changes directly to:

a. Army DA Form 2028, direct to: Commander, U.S. Army Troop Support Command, ATTN: DRSTS-MPP, 4300 Goodfellow Blvd., St. Louis, Missouri 63120. A reply will be furnished directly to you.

b. Air Force AFTO Form 22 in accordance with T.O. 00-5-1, direct to: Commander, Sacramento Air Material Area, ATTN: MMEDT, McClellan AFB, California 95652.

c. Navy Letter, direct to: Commanding Officer, U.S. Navy Ship Parts Control Center, ATTN: Code 783, Mechanicsburg, PA 17055.

d. (MC) Marine Corps - by NAVMC Form 10772 directly to: Commandant, Headquarters, US Marine Corps, ATTN: LMA-1, Washington, DC 20380.

By Order of the Secretaries of the Army, the Navy, and the Air Force:

Official:

ROBERT M. JOYCE
Brigadier General, United States Army
The Adjutant General

E. C. MEYER
General, United States Army
Chief of Staff

W. M. ZOBEL
Rear Admiral, CEC, U.S. Navy
Commander, Naval Facilities
Engineering Command

Official:

LEW ALLEN, JR., *General, USAF*
Chief of Staff

JAMES L. WYATT, JR., Colonel, USAF
Director of Administration

H. A. HATCH
Lieutenant General, U. S. Marine Corps
Deputy Chief of Staff for Installations and Logistics

DISTRIBUTION:

To be distributed in accordance with DA Form 12-25D, Organizational Maintenance requirements for Generator Sets, Engine Driven, 30 KW 400 HZ Precise Power and 30 KW 60 HZ Precise Power.

Marine Corps:

MARCORPS CODE: AGC

IN THIS SPACE TELL WHAT IS WRONG
AND WHAT SHOULD BE DONE ABOUT IT:

In line 6 of paragraph 2-1a the
manual states the engine has
6 Cylinders. The engine on my
set only has 4 Cylinders.
Change the manual to show 4
Cylinders.

Callout 16 on figure 4-3 is
pointing at a bolt. In key
to figure 4-3, item 16 is called
a shim - Please correct
one or the other.

I ordered a gasket, item
19 on figure B-16 by NSN
2 910-00-762-3001. I got a
gasket but it doesn't fit.
Supply says I got what
I ordered, so the NSN is
wrong. Please give me a
good NSN

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weight

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet
